**International Conference 2009: "Opportunity: Post-mining landscapes", 15th – 17th
September 2009**

Dear Sir or Madam,

We would like to invite you to our International Conference "Opportunity: Post-mining landscapes" from 15th to 17th September 2009 on the IBA-Terraces in Großräschen. After ten years of work in the Lusatian lignite region the International Construction Exhibition (IBA) and its partners provide a platform for the international exchange of experiences for which speakers from all over the world will make suggestions for handling post-mining landscapes.

You will have the possibility to exchange experiences, get new ideas and develop proposals for handling post-mining landscapes at a unique place that makes the structural change after mining clear like no other place. Before the conference begins we shall put theses and questions up for discussion on our Internet platform.

More information is available on our Internet page www.iba-see.de. You can also find the current conference programme there. You are welcome to forward the invitation to other interested persons. We look forward to welcoming you on the IBA Terraces in September.

Kind regards

Rolf Kuhn
